

HARDIK KUBAVAT

Ahmedabad, Gujarat | +91 8140900320 | hardikkubavat0110@gmail.com | <https://github.com/Hardik0110>

SUMMARY

Innovative and results-driven Full-Stack Developer with extensive experience in designing, developing, and maintaining scalable web applications using modern technologies. Proficient in both front-end and back-end development, with expertise in *HTML5*, *CSS3*, *JavaScript (ES6+)*, and frameworks such as *React.js* for responsive client-side interfaces, and *Node.js* with *Express.js* for robust server-side operations. Skilled in working with both *SQL* and *NoSQL* databases like *MongoDB* and *MySQL*, ensuring efficient data management and *RESTful API* integration. Committed to writing clean, maintainable code and delivering high-performance solutions.

PROFESSIONAL EXPERIENCE

BHARATROBOTIX

Website Developer Intern

Ahmedabad/Gujarat

June – August 2024

During my internship as a web developer at **BharatRobotix** Company, I had the opportunity to work on an exciting project that involved creating a 3D dynamic website. Tasked with enhancing the company's online presence, I utilized cutting-edge technologies such as *React* and *Three.js* to build an immersive, interactive experience.

3D Dynamic Website

- Architected and implemented a cutting-edge 3D dynamic website using *React.js* and *Three.js* to enhance the company's digital presence
- Designed and developed complex 3D animations and real-time data visualizations, creating an immersive and interactive user experience
- Implemented responsive design principles and optimized the website's performance across various devices, addressing challenges related to rendering and user interaction
- Leveraged version control with *Git* for efficient collaboration and deployed the website successfully using modern CI/CD practices

SKILLS

- Programming Language :- *Javascript , PHP , Python.*
- Front End Development :- *HTML5, CSS3, JavaScript (ES6+), React.js, Responsive Web Design.*
- Back End Development :- *Node.js, Express.js, RESTful APIs.*
- DevOps & Tools :- *Git, GitHub, GitLab, Vercel, Agile methodologies.*
- Additional :- *Three.js, TailwindCSS, Web Performance Optimization, Cross-browser compatibility.*
